SUMMARY

Frontend developer with 5+ years building responsive, accessible web and mobile products in React.js, TypeScript, Next.js, Angular, and Ionic. Experienced in shipping dashboards, CRM modules, and a live learning platform, with a focus on reusable component libraries and performance. Extends that frontend depth into the Microsoft ecosystem, building SPFx web parts (React, TypeScript, Fluent UI) and supporting Power Apps, Power Automate, and Copilot Studio solutions on SharePoint and Dataverse.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Angular, Ionic, React Native, HTML5, CSS3

UI & Styling: Tailwind CSS, Bootstrap, Fluent UI, Flexbox, Grid, Responsive Design, Accessibility (WCAG basics)

State & Data: Redux, Zustand, Context API, REST APIs, Axios, Fetch API, JSON

SharePoint & M365: SPFx, SharePoint Online, Microsoft Graph API, Teams Integration, Gulp / Yeoman

Power Platform: Power Apps (Canvas & Model-Driven), Power Automate, Copilot Studio, Power Fx, Dataverse, Custom Connectors, Solution ALM

Backend & Tools: Node.js, Express.js, MongoDB, Azure Functions (basics), Git, GitHub, Power Platform CLI, Figma, Agile / Scrum

WORK EXPERIENCE

Senior Frontend Developer (SharePoint & Power Platform) **Jun 2026 – Present**

JJSoft Techno Private Limited — Chennai, Tamil Nadu, India

- Build reusable SPFx web parts with React.js, TypeScript, and Fluent UI, extending SharePoint Online sites beyond out-of-the-box capability.
- Develop Canvas and Model-Driven Power Apps that replace spreadsheet-based processes with role-based apps on a governed data source.
- Automate approvals, notifications, and data sync with Power Automate flows across SharePoint, Outlook, Teams, and Dataverse.
- Build Copilot Studio agents with custom topics, knowledge sources, and Power Automate actions to answer routine employee queries.
- Model Dataverse and SharePoint schemas, enforce rules in Power Fx, connect REST APIs and Microsoft Graph via custom connectors, and release through solution-based ALM across dev, test, and production.

Senior Front-end Developer **Nov 2024 – May 2026**

BrainCert — Remote, India

- Built responsive web and mobile interfaces for a live learning platform using React.js, TypeScript, Angular, and Ionic.
- Established a shared component library and architecture that removed duplicated UI code and sped up new screen builds.
- Improved rendering performance and perceived load time through memoisation, list virtualisation, and code-splitting.
- Integrated RESTful APIs and worked with backend and QA teams to resolve edge cases before release.
- Developed SPFx web parts (React, TypeScript, Fluent UI) and Power Apps / Power Automate solutions on SharePoint Online, integrating SharePoint REST API and Microsoft Graph to automate approvals and notifications.

UI Developer **Nov 2022 – Oct 2024**

Elroi Software Solutions — Madurai, Tamil Nadu, India

- Built dashboards, CRM modules, and enterprise UI features with React.js and Tailwind CSS.
- Created a reusable component set and design-system conventions that kept the UI consistent as modules grew.
- Integrated internal and third-party APIs with Fetch and Axios, managing state with Redux and Zustand.
- Improved accessibility on key workflows: keyboard navigation, colour contrast, and small-screen layouts.

UI Developer **Aug 2021 – Sep 2022**

KitKat Software Solutions — Coimbatore, Tamil Nadu, India

- Converted Figma and Adobe XD designs into responsive HTML, CSS, and JavaScript interfaces, tested across Chrome, Firefox, Edge, and Safari.
- Built reusable frontend components and worked with designers to fix spacing, typography, and interaction-state issues before QA handoff.

Graphic Design Intern **Jan 2021 – Jul 2021**

Woua Software Labs — Bengaluru, Karnataka, India

- Produced UI assets and visual designs for web use, and supported frontend fixes while moving into frontend development.

KEY PROJECTS

- **SharePoint Intranet Portal (SPFx).** Custom SPFx web parts in React, TypeScript, and Fluent UI for announcements, directory, and search. Integrated SharePoint REST API and Microsoft Graph; added property panes for code-free configuration; packaged for tenant-wide deployment.
- **Learning Management System (Web & Mobile).** Responsive LMS interfaces in React.js, Tailwind CSS, and Ionic on one shared component set, with REST API integration for authentication, course progress, and role-based access.
- **Approval Management System (Power Apps & Power Automate).** Canvas app on Dataverse and SharePoint for submitting and approving requests, with multi-level approval flows, overdue escalation, Teams/email alerts, and Power Fx validation and role-based access.
- **Copilot Studio Employee Self-Service Agent.** Agent answering HR and IT policy questions from SharePoint libraries, with Power Automate actions to raise leave requests and IT tickets; deployed to Teams and SharePoint.
- **CRM, E-commerce & Accounting Dashboards.** Data-driven React.js modules with product listings, forms, tables, and validation, using Redux and Zustand for state.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Mechatronics Engineering — De Montfort University, Singapore (2015 – 2019)

- IBM Full Stack Development Certification (MERN: React.js, Node.js, Express.js, MongoDB)
- freeCodeCamp Responsive Web Design Certification
- HackerRank JavaScript Certification
